Certified Quality

Hulas Aluminium

Profile Series

78
mm

90
mm

100
mm

Special
Series

(Available in Mill Finished, Anodized & Powder Coated)

Alloy Composition

Si	Fe	Cu	Mn	Mg	Cr	Ti	Others	Balance
0.2-0.6	0.35 max	0.1 max	0.1 max	0.45-0.9	0.1 max	0.1 max	0.15 max	Al

Mechanical Properties of Mill Finished Products

1 Proof Strength	(kgs / mm ²)	13 min
2 Tensile Strength	(kgs / mm ²)	18 min

Anodized Sections

1 Natural Anodized	12 microns min		
2 Electro-colour range	a) Dark Bronze	b) Light Bronze	c) Champagne
3 Surface Type	Glossy		
4 Features	Corrosion resistant, durable		

Powder Coated

1 Coating thickness	60-80 microns (PP base for exterior durability)		
2 Colour range	a) Ivory	b) Coffee Brown	c) Anodized Black
	(Other shades available on specific orders only)		
3 Surface Type	Semi-gloss (Glossy / matte available on orders only)		
4 Features	Weather –resistant colours to match exteriors		

Tolerance in Profile Weight	+/- 10% of catalogue weight
Length Available	20 feet max
Packing	Wrapped in polythene and finally bundled in Poly-woven sacks.
